### PROGRAMME REPORT

<b>Name of the programme :</b>	A One Day Seminar On <b>Research Methodology : Tools And Techniques</b>
<b>Date of the programme:</b>	09.07.2018
<b>Resource person details :</b>	Mr.Devarajulu Koneti Program Director, HCL Chennai. Ph no:9566064159 Mail id:devarajuluk@gmail.com
<b>Program co-ordinator:</b>	Mr .V.GANAPATHIRAM, Asst Prof HOD CSE DEPARTMENT, WISE ENGINEERING
<b>Organized by :</b>	DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING
<b>venue :</b>	West Godavari Institute of Science and Engineering

### OBJECTIVES OF THE PROGRAM

Research methodology is a way of explaining how a researcher intends to carry out their research. It's a logical, systematic plan to resolve a research problem. A methodology details a researcher's approach to the research to ensure reliable, valid results that address their aims and objectives. It encompasses what data they're going to collect and where from, as well as how it's being collected and analyzed.

Tools and techniques in research are the statistical methods of collection, analysis, interpretation, presentation, and organization of data. Statistics provides numerous tools and techniques to analyze the data and interpret the results of the analysis.

#### Topics covered:

- Why is a Research Methodology important?
- Types of Research Methodology
- Types of sampling design in Research Methodology
- Common data collections methods
- Common data analysis methods
- Factors to consider when choosing a Research Methodology

## **OUTCOME OF THE PROGRAM:**

A research methodology gives research legitimacy and provides scientifically sound findings. It also provides a detailed plan that helps to keep researchers on track, making the process smooth, effective and manageable. A researcher's methodology allows the reader to understand the approach and methods used to reach conclusions.

A detailed account of the research experience from selection and experience of the problem, formulation of hypotheses, gathering, analyzing and interpreting data, testing of hypotheses, making conclusion and suggesting further research in the related problem area is called a research report.

## OBJECTIVES OF THE PROGRAM

Ethical leadership is leadership that is directed by respect for ethical beliefs and values and for the dignity and rights of others. It is thus related to concepts such as trust, honesty, consideration, charisma, and fairness. Ethics is concerned with the kinds of values and morals an individual or a society finds desirable or appropriate. Furthermore, ethics is concerned with the virtuousness of individuals and their motives. A leader's choices are also influenced by their moral development.

## **OUTCOME OF THE PROGRAM:**

Leadership that is ethical is important for a variety of reasons, for customers, employees, and the company as a whole. Leadership skills are crucial to help create a positive ethical culture in a company. Leaders can help investors feel that the organization is a good, trustworthy one. Customers are more likely to feel loyal when they see leaders in place in an organization. Good press is likely to come when there are ethical leaders in an organization. Partners and vendors will similarly feel they can trust and work well with an organization when they see leadership that is ethical displayed.

## OBJECTIVES OF THE PROGRAM

A startup is a new and emerging business, typically in the early stages of operation. Startups are characterized by rapid growth and scalability, and they often rely on funding from investors, grants, or other sources to get off the ground and grow. Startups often try to disrupt established markets or create new ones, and as a result, they can be high-risk ventures. An entrepreneur starts and runs a business. They are responsible for making key decisions, taking risks, and driving the success or failure of the business. Entrepreneurs are often driven by a desire to create something new and innovative, and they often have a clear business vision and goals.

## OUTCOME OF THE PROGRAM:

Nurturing entrepreneurship can have a positive impact on an economy and society in several ways. For starters, entrepreneurs create new businesses. They invent goods and services, resulting in employment, and often create a ripple effect, resulting in more and more development. For example, after a few information technology companies began in India in the 1990s, businesses in associated industries, like call center operations and hardware providers, began to develop too, offering support services and products. Entrepreneurs add to the gross national income. Existing businesses may remain confined to their markets and eventually hit an income ceiling. But new products or technologies create new markets and new wealth. Additionally, increased employment and higher earnings contribute to a nation's tax base, enabling greater government spending on public projects.

## OBJECTIVES OF THE PROGRAM

Intellectual Property Rights (IPRs) are the rights associated with intangible property owned by a person/company and protected against use without consent. Thus, rights relating to ownership of intellectual property are called Intellectual Property Rights. These rights aim to protect intellectual property (creations of human intellect) by allowing the creators of trademarks, patents, or copyrighted works to benefit from their creations. The Universal Declaration of Human Rights (UDHR) also refers to intellectual property rights under Article 27 which states that “Everyone has the right to the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author.”

### Topics covered:

- Meaning, Nature and Rights of Intellectual Property
- Need for legal protection of intellectual property rights
- Advantages and Disadvantages of Intellectual Property Rights
- Components of Intellectual Property Rights
- Steps to register copyrights in India
- Procedure for getting a Patent in India

## OUTCOME OF THE PROGRAM:

The importance of Intellectual property rights in a world of technological, scientific, and medical innovation cannot be ignored at any cost. IP is a valuable asset since it provides a competitive advantage to the owner over other entities. To make the most out of IPR, it is advisable to get it registered. An intellectual property right is a proprietary right on the product of one's intellect. These rights support innovation and help the innovators at every stage of the business development, competition, and expansion strategy. It is also noteworthy that registered and enforced IP rights enable the consumers to make an informed choice about the quality, safety, reliability of their purchase.

## OBJECTIVES OF THE PROGRAM

A Data Management Plan, or DMP (sometimes also called a data sharing plan), is a formal document that outlines what you will do with your data during and after a research project. It describes the type of data you use for your research, how are collected, organized, and stored, and what formats you use. When sensitive data are used, the DMP must also describe what steps you are taking to make your data secure and compliant with regulations. It details how data will be accessible and documented for sharing and reuse during and after the project is finished. DMP are required by an increasing number of funding entities and research institutions. "
