Geographically, it derives a majority of its revenue from India and also has a presence in the USA and the Rest of the world. Its product includes prawn feed, scampi feed, and fish feed.

MOUs communicate the mutually accepted expectations of the people, organizations, or governments involved. They are most often used in international relations because, unlike treaties, they can be produced relatively quickly and in secret. They also are in use in many U.S. and state government agencies, particularly when major contracts are in the planning stages.

A memorandum of understanding allows all parties to clearly state all of their objectives and goals. This makes for less uncertainty and prevents future unexpected disputes from occurring.
